INTERNSHIP PRESENTATION

WEB DEVELOPMENT

Shri Banke Bihari Educational Society
Ramnagar, Uttarakhand

PRESENTED BY

KEERTIKA NEGI

ROLL NO.

25SCS1003004120

B.Tech CSE | Batch 2026–27

11 JUNE — 11 JULY 2026

01

Internship at a glance

A short period of practical work that helped me understand how web development functions beyond the classroom.

ROLE	ORGANIZATION	DURATION
Junior Web Developer	Shri Banke Bihari Educational Society	11 June – 11 July 2026

The internship allowed me to connect concepts learned during my B.Tech CSE studies with practical website development, improvement and maintenance.

The organization I worked with

Shri Banke Bihari Educational Society

Ramnagar, Uttarakhand

The society works in education and social development, with a focus on creating opportunities for learning and supporting the overall development of students.

DIGITAL PRESENCE

A website helps the organization communicate its programs, activities, facilities, admissions and updates in one accessible place.

Clear • accessible • professional

The problem I was addressing

When information is difficult to find, even a useful website can become frustrating to use.

The project therefore focused on improving the way institutional information was structured, presented and accessed through the web platform.

01

STRUCTURE

Organize information so users can find what they need.

02

USABILITY

Keep navigation and page presentation simple.

03

RESPONSIVENESS

Support a consistent experience across screen sizes.

What I set out to achieve

- 01 Apply web development concepts from academics to practical work.

- 02 Improve the structure, design and presentation of web pages.

- 03 Support clear and accessible presentation of the organization's information.

- 04 Identify and resolve basic layout, responsiveness and usability issues.

- 05 Build professional skills in testing, debugging, communication and teamwork.

What the project involved

Web pages

Designing and modifying page structure and content.

User interface

Improving layout, readability and presentation.

Content

Organizing institutional information clearly.

Responsiveness

Checking the experience across different screen sizes.

Maintenance

Reviewing pages and resolving basic issues.

Future scope

Performance, accessibility and additional features.

Tools used during the internship

HTML

Structure and content

CSS

Layout and visual styling

JavaScriptInteractivity and dynamic
behaviour**Bootstrap**

Responsive layouts

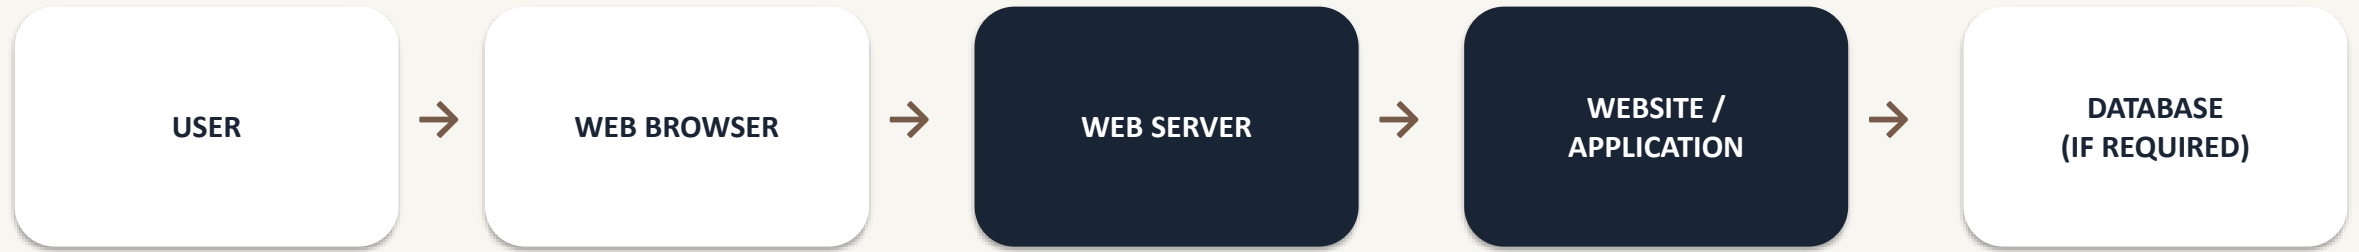

Visual Studio Code

Code editing

**Browser Developer
Tools**

Testing and debugging

A simple web-based flow

The browser sends a request → the server processes it → the required page or information is returned to the user.

How I approached the work

01

**Understand
requiremen
ts**

02

**Study
existing
website**

03

**Plan
changes**

04

**Develop &
modify**

05

Test

06

**Debug &
improve**

07

Review

I learned that development is iterative: understanding the requirement, testing the result and improving it are all part of the same process.

What the internship taught me

TECHNICAL

I became more comfortable with web structure, styling, responsiveness, testing and debugging.

PRACTICAL

I saw how small design and usability decisions can affect the way people experience a website.

PROFESSIONAL

I developed better habits around communication, reviewing work, solving problems and making improvements.

The biggest learning was not just how to build a page, but how to think about the person using it.

What I came away with

From classroom concepts → to practical understanding

WEB DEVELOPMENT

A clearer understanding of how pages are structured, styled and maintained.

TEAMWORK

Better communication and understanding of working within an organization.

PROBLEM SOLVING

More confidence in identifying and fixing basic web issues.

CONFIDENCE

A stronger foundation for taking on future web development projects.
